

AI Law Practice Automation System

Wealth Horizons Academy | \$1497

TRANSFORM YOUR LAW PRACTICE WITH AI AUTOMATION

AI is fundamentally changing the practice of law. Attorneys who leverage AI will be able to serve more clients, at higher quality, in less time. Those who ignore it will be at a significant competitive disadvantage.

MODULE 1: AI TOOLS TRANSFORMING LEGAL PRACTICE

Document Review and Analysis

AI document review platforms can analyze thousands of documents in hours rather than weeks.

Key Platforms: - Relativity: Large-scale document review for litigation - Kira Systems: Contract analysis and data extraction - Luminance: AI-powered document review with pattern detection - Litera: Contract intelligence and lifecycle management

Primary Benefits: - Identify relevant documents faster (80-90% cost reduction) - Consistent application of review criteria - Pattern recognition across large document sets - Risk identification in contracts

Legal Research Automation

AI legal research tools dramatically reduce research time.

Platforms: - Westlaw Edge: AI-enhanced legal research - LexisNexis Context: AI-powered legal research - Casetext CARA: AI-assisted brief analysis - Fastcase: Analytics-enhanced legal research

Research that previously took 4 hours takes 30 minutes with AI assistance.

MODULE 2: CONTRACT AUTOMATION

Contract Drafting with AI

AI can draft contract first drafts from parameters you provide: 1. You specify deal terms and parties 2. AI generates complete draft from your templates + deal terms 3. Attorney reviews, edits, and approves 4. Finished contract in 20 minutes vs 4 hours

Contract Analysis and Risk Scoring

AI contract analysis can: - Identify non-standard clauses automatically - Flag missing provisions that should be present - Score overall contract risk (high/medium/low) - Extract key terms into a deal summary - Compare to your standard positions

Contract Management

Store and manage all contracts with AI-powered search: - Find any contract by party, term, or clause language - Receive automatic renewal and expiration alerts - Track obligation completion - Monitor compliance across contract portfolio

MODULE 3: CLIENT COMMUNICATION AUTOMATION

Intake Automation

Automate new client intake: 1. Client completes online intake form 2. Conflict check runs automatically 3. If clear: Engagement letter auto-sent for e-signature 4. Payment collected automatically 5. Matter opened in practice management system 6. Welcome email sequence begins

Status Update Automation

Clients hate not knowing what is happening in their matter.

Automate regular status communications: - Weekly matter update email (template-based, personalized data) - Milestone notifications (complaint filed,

discovery complete, hearing scheduled) - Deadline reminders to client - Settlement/resolution updates

MODULE 4: AI ETHICS AND RESPONSIBILITY

Ethical Obligations in AI-Assisted Practice

ABA Model Rules and state equivalents require: - Competence: Understanding the AI tools you use - Supervision: Reviewing all AI-generated work product - Confidentiality: Ensuring client data is protected in AI systems - Communication: Being transparent about AI use when appropriate

Common AI Risks in Legal Practice

1. Hallucination: AI inventing case citations that do not exist Solution: Verify every citation before including in any document
2. Confidentiality breach: Client data in cloud-based AI tools Solution: Understand each tool's data handling policy
3. Over-reliance: Using AI output without sufficient review Solution: AI assists; attorney is always responsible
4. Bias in predictive tools: AI may reflect historical biases Solution: Use human judgment alongside algorithmic predictions
