YOUR FACE YOUR VOICE 24/7

The PRO Edition adds the most powerful feature in podcast marketing: your AI avatar. Your branded avatar delivers content while you sleep.

WHAT IS AN AI AVATAR?

An AI avatar is a photorealistic digital version of you that speaks with your voice, delivers your content, and represents your brand — created from your photo and voice sample.

How AI Avatars Are Created

1. Upload a high-quality front-facing photo
2. Record a 2-3 minute voice sample
3. AI generates your avatar and voice clone
4. You script your content, avatar delivers it
5. Produce unlimited video content without being on camera
